MADE IN HOLLAND

Since our start we have a strong cooperation with sheltered workshops for most of our assembly work.

CO₂ COMPENSATED

We compensate all our CO₂ emissions since 2009, in close cooperation with Ecochain and FairClimateFund.

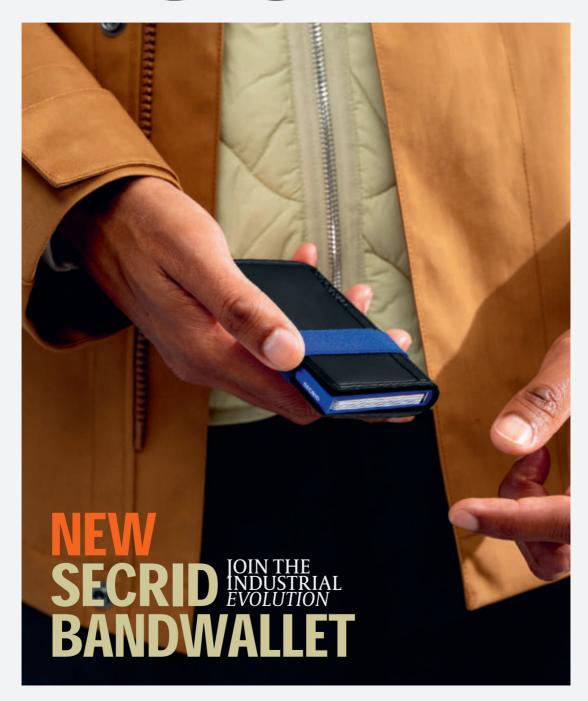

WE ARE B CORP

We believe that a brand can only be truly successful when as many people as possible are part of the success.

Saturnusstraat 81 2516 AG The Hague The Netherlands

We use our business as an energy for good.

01

Made in Holland

Our products are entirely produced in Holland (EU), with some materials from Belgium, Germany and Italy.

02

Sheltered workshops

Since our start we have maintained a strong cooperation with sheltered workshops for most of our assembly work.

03

CO₂ compensated

We compensate all our CO₂ emissions since 2009, in close cooperation with Ecochain and FairClimateFund.

04

EU leather

Our European cowhides are chosen and produced with utmost care for labour standards and environment.

FOUNDERS' LETTER

Dear partners,

We're proud to announce that we have received the B Corp certificate. This certificate shows that we take our role in society today very serious. A responsibility that becomes more important every day in this turbulent world, with climate change, COVID and Ukraine filling the headlines daily in most countries. Topics with a far-reaching influence on the lives of many. Meanwhile, we hope you manage to stay healthy and safe. However, at Secrid we remain positive about the future.

Luckily, we have all manufacturers in Europe close to home, that way we didn't suffer from supply chain troubles, like many other brands experienced in Asia. However, lead times for raw materials have been rising globally. Even for our gift boxes the lead time has multiplied from 3 weeks to 3 months. Our Supply Chain team has been working really hard to cover these types of problems. Not only for carton, but also for aluminium, stainless steel, leather, and all other critical parts.

Moreover, climate change starts to affect daily life and is much more serious than COVID. We are glad that we made the choice to be carbon compensated ever since the launch of our first Cardprotector in 2009, through our cooperation with FairClimateFund. (secrid.com/en-nl/sustainability). One of the most efficient ways to save the planet is to design better products, manufactured in a sustainable way. As a Secrid partner, you have first-hand experience with our continuous efforts to optimise the lifespan of our products and our commitment to excellence in design and usability.

This summer we present several new designs in our collection. One of them is the Bandwallet, which is made from welded TPU; our innovation in the field of long-lasting and great looking non-leather materials. And due to the huge success in our previous collection, we decided to add some new automotive designs. We hope you'll enjoy a great summer season and wish you all the best.

We wish you great business. Stay safe and warm regards, Marianne & René

Responsible

i secrid.com/en-global/about/b-corp

SECRID IS A **B** CORP

B what! B Corp means Benefit Corporations and is a worldwide movement of companies that belong to the best performing in the field of social and environmental responsibility. We are proud of the fact that Secrid is now a B Corp. This is not the end of the road for us. but a milestone on the road we have been travelling since we started.

B Corporations are companies that use business as a force for good. While too many companies strive only to make as much profit as possible at all costs, B Corporations primarily look at the consequences for people, nature and the planet.

We believe a brand is only truly successful when that success is shared with others. For us, success is not expressed in profit, but in the successful spread of our mission: the insight that change starts in your own pocket. With a small object we strive for impact on a large scale. By showing others that they have the power to change the world. A wave is the result of many ripples.

In our view, the right balance between people, animals and the environment is essential. For this reason, for example, we set up our production chain in

Secrid Brandstore Rotterdam, The Netherlands

UNIFYING GOAL

79 COUNTRIES

153 **INDUSTRIES**

4855 **COMPANIES**

the Netherlands in 2009, totally against the trend. Together with our suppliers, including social work organizations, we have developed our own production processes, allowing us to compete with Chinese factories in a clean and responsible way. Having ourselves certified as a B Corp was a logical next step.

However, this is a snapshot, a successful benchmark for our company. We know where we stand now and we are mapping out our path to a sustainable and social future in which we achieve an even better balance between people and planet.

SECRID

Environmentally responsible

INDUSTRIAL EVOLUTION

It is time to face up to it, we buy too many products. Since the Industrial Revolution, we have exponentially increased our consumerism. Because of that we are now surrounded by more products than ever before. Although we now enjoy a higher standard-of-living than before the Industrial Revolution, this behaviour comes at a huge cost to our planet's ability to sustain us.

The time for change is now. More than ever, we need to slow things down, reset, and radically change the way the industry makes things. Instead of creating more and more poorly-made products with short lifespans, we need to create products which are sustainably produced and become better with each new version with a focus on longevity. Only this way we can turn the Industrial Revolution into Industrial Evolution.

More than ever, we need to slow things down, reset, and radically change the way the industry makes things.

NEW LOOKS, SAME DEDICATION FOR 2022 / 23

The latest styles and colours have new looks, but are made in familiar ways. With a compensated carbon footprint, all these wallets are responsibly made in Holland. All made to last.

MODELS

Secrid wallets are made in Holland, with great care for product, people and our planet. The patented mechanism allows you to slide out your cards with one simple motion. The aluminium casing protects from bending, breaking and unwanted wireless communication (RFID safe).

CARDPROTECTOR

The heart of our collection and our most minimalist wallet. The aluminium protects your cards against bending, breaking and unwanted wireless communication.

63 x 102 x 8 mm

MB

MONEYBAND

Our smallest solution for banknotes, cards and receipts. Made of colourful elastic and stainless steel, the rubber detail on the inside keeps everything firmly in place.

joins 2	+4

tectors	cards	space

25 mm (height)

CARDSLIDE

A modular wallet consisting of a Cardprotector and a Slide, held together by a Moneyband. The Slide provides extra space to carry business cards, banknotes or any smaller personal items.

68 x 103 x 19 mm

BANDWALLET

With a band keeping everything tightly in place, the Bandwallet is slim and secure. A drop-shaped cut-out makes it easy to see and take out cards from the inside pocket.

4/6	+6	
protected	extra	more
cards	cards	space

68 x 102 x 16 mm

MINIWALLET

Our most iconic wallet and the perfect all-rounder. The Miniwallet is compact in size and surprisingly large in storage capacity. With a wide variety of styles and colours, it fits every pocket.

4/6	+4	
protected	extra	more
cards	cards	space

65 x 102 x 21 mm

SLIMWALLET

Carry more with an even slimmer profile. The Slimwallet's leather has a wider cut, while retaining a slim silhouette. This way it fits easily into a front or breast pocket.

ALUMINIUM

THE CARDPROTECTOR

The Original

The aluminium Cardprotector is the heart of our collection and our most minimalist wallet. It has a patented sliding system that gives access to the cards you use most with one simple click. Additionally, the Cardprotector protects your cards against bending, breaking and unwanted wireless reading of RFID and NFC cards. The Cardprotector won the Red Dot Design Award 2009.

ALUMINIUM

THE CARDPROTECTOR POWDER

A new step towards a zero-waste supply chain We are constantly looking for solutions with regard to aluminium Cardprotectors with tiny superficial flaws, which are not up to our quality standards. The texture and brightly coloured mechanism make the new Cardprotector Powder a true eye-catcher, and represent another step closer to a zero-waste supply chain. A year of research has resulted in a new powder-coating technique. These functionally excellent Cardprotectors are covered with a new layer of powder coating.

THE NILE

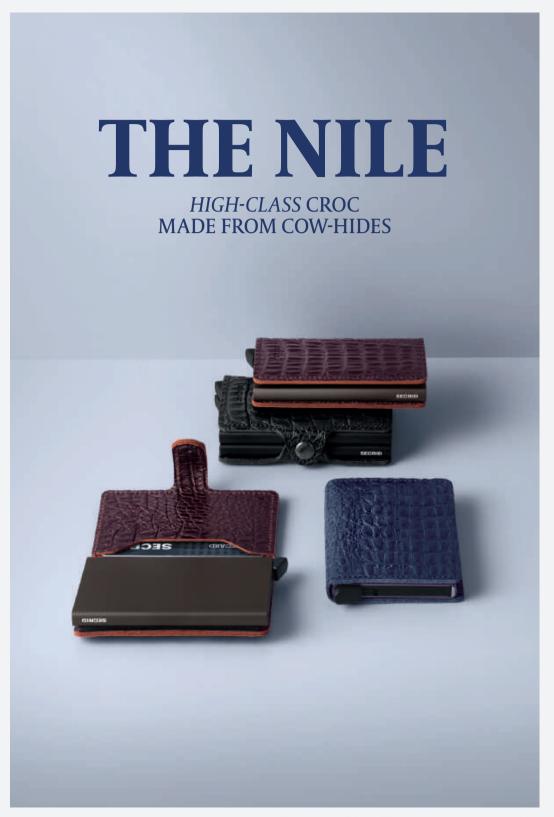

High-class croc, made from cow-hides This leather has a handmade crocodile embossed finish. The deep rich multitoned colour is achieved with the special tamponato technique and finished with a high gloss.

SPECIFICATIONS

- Finished by hand
- High-gloss crocodile
- embossing
- European cowhide
- Tanned and finished in the Netherlands
- Cut and stitched in the Netherlands

THE VEGETABLE TANNED

Natural beauty

La Bretagna is one of only a few tanneries left in Tuscany that employ the traditional technique of vegetable tanning at a high level. They process the hides using leaves, bark and even fruit instead of chemicals. It produces beautiful leather that becomes richer through use.

Responsible

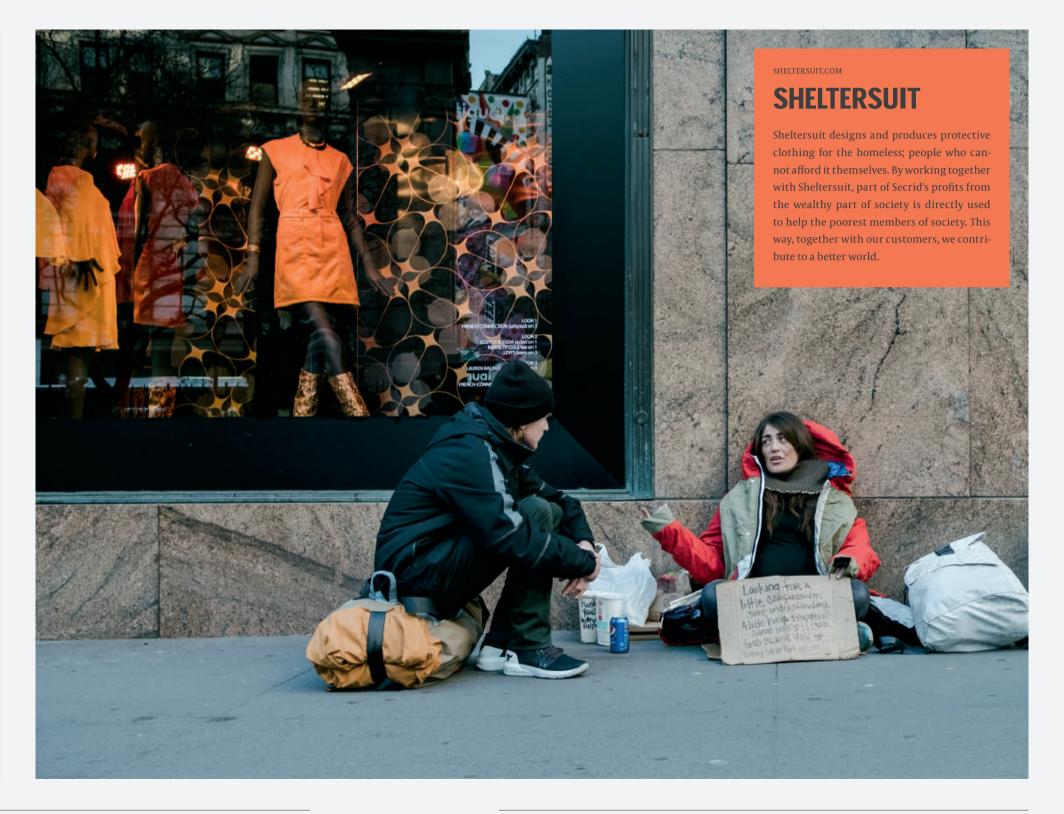

WE GIVE BACK

We look at the world holistically and believe that everything and everyone is connected. Every choice has an impact on the bigger picture. That's why Secrid handles change with care. We change and evolve, we inspire others to act, and we like to contribute to positive change in the world.

In addition to Secrid's way-of-working and mission, we support socially relevant projects that are in line with our mission. In order to create a ripple effect with our profits in the bigger picture. With the Secrid Impact Fund, we donate 1% of our revenue to causes that contribute to a better world. In recent years, Secrid has supported The Ocean Cleanup, the Verkaart Foundation Kenya, FairClimateFund, and since 2020, Sheltersuit, among others.

SHELTERED WORKSHOP

Sustainability also means respect for people and society. This is why we choose to work with sheltered workshops. Every day nearly a hundred people assemble our products with enthusiasm and precision in Leiden, Delft and Haarlem.

Together with these colleagues, we are constantly developing the tools and processes to maintain the quality of the product and the working conditions. After all the various components have been assembled, every wallet receives its unique serial number as proof of authenticity.

Sheltered workshop DBZ Leiden, The Netherlands

PRODUCTION

MADE IN HOLLAND

By 2009 the leather

industry had prac-

tically abandoned

the Netherlands in favour of low-in-Secrid has brought this industry back to our home coun*try.* By developing a revolutionarily different product and production process, wallets are once again being produced on a large scale in the Netherlands. More efficiently and cleaner than ever, in a quantity never before seen in this tiny country. Close cooperation with our 50 suppliers is therefore very important: from the sewing workshop in Vlaardingen to the sheltered workshop in Leiden. Producing in favourable conditions and with due care for Secrid has already 200 jobs in the Netherlands.

SECRID

Environmentally responsible

i secrid.com/en-global/collections/powder

A NEW STEP TO ZERO WASTE

Powdercoating is the new step forward in our pursuit of zero waste production. Profiles that we once rejected because of spots or streaks are given a new look with powder coating.

All our profiles are finished with a tough anodising layer that protects the soft aluminium from scratches. Due to the transparent nature of this anodising layer, the profile retains a metallic appearance. Unfortunately, this means that any spots and streaks in the aluminium remain visible. We have always stored profiles that we had to reject for this reason, waiting for a solution. We have now found this in powder coating. This is not only robust, but also opaque. It is an old technique, but after a long period of fine tuning, our supplier succeeded perfectly.

POWDER COATING

Powder coating is opaque. As a result, we never again have to reject profiles with a streak or a speck in the aluminium surface. A new step towards zero-waste production.

A container of coloured powder is connected to a manually operated spray gun, with which the powder is blown with low pressure in the direction of the profiles. Because of static electricity, this dry powder sticks to the profiles.

CHANGE STARTS IN YOUR POCKET

In 2009 Secrid introduced its first
Cardprotector. In addition to
being surprisingly handy, it is also
beautiful and magical. Behind this
pocketwear from Secrid lies a new
world. A practical and innovative
product line which has received
multiple international awards for
its quality and innovative features.
Millions of people around the world
have been using them daily for
years.

But most importantly, we want people to discover how much influence their consumer behaviour has, because with every purchase, a piece of the world changes. We link this awareness to our products. With Secrid, you're carrying something good: an ethical product that is socially and sustainably produced, long-lasting and should the need arise - repairable.

As a consumer you have more power than you think, because with every purchase

രി

- 02 Leather research
- 06 Assembly in the sheltered workshop
- 04 First batch
- 07 Finished wallet

you make, you influence the industry. Our products are therefore not only practical, but also an inspiration to consume in a more conscious way. With an eye for the world and the people around us.

Industrial design and fashion come together in our pocket-sized essentials. Made in the Netherlands, with the greatest care for quality, people and the environment. Secrid prioritises personal, lasting relationships with our retailers, suppliers and customers. Our core principle is that the entire production and distribution chain is a way to make a positive impact on the industry and on people, including through local production and assembly in sheltered workshops. Secrid maintains high standards of quality and sustainability, and by working locally with specialist suppliers we are able to raise those standards even higher each year. Because we ourselves are fully committed to the challenge of delivering the best quality.

Our company is driven by creativity, interest in people and a holistic approach to sustainability. This has led to our new vision of product development. We call it *Industrial Evolution*. The general guideline is simple: every new product must be better than the previous ones. When all consumers start demanding this of companies, the world will change for the better. With products that last longer and contribute to sustainability.

Big changes happen in small steps, one after the other. Drops become rivers. Everyone contributes to this. A better world starts in your pocket.

Payment protection

i secrid.com/en-global/about/protect-your-cards

RFID

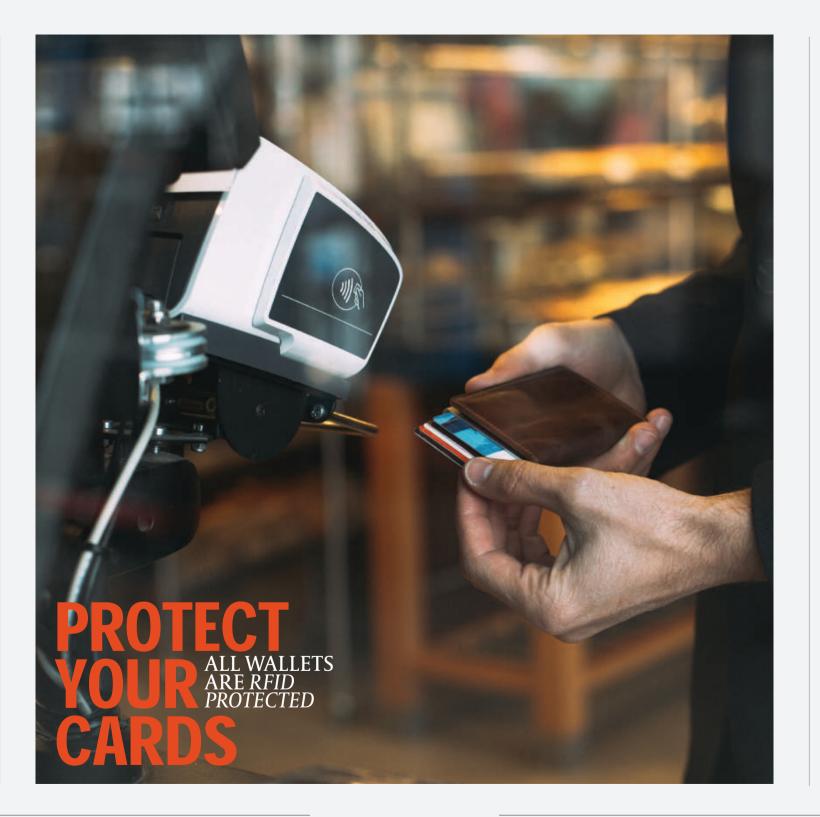

Your *privacy* remains protected

The latest generation of bank, travel and ID cards is equipped with RFID (radio-frequency identification) chips and antennas to enable wireless communication.

This is convenient but also comes with risks, as RFID cards can be scanned and skimmed from considerable distances. Theft of personal data and money may occur without being noticed. When these cards are completely inside the Cardprotector, this wireless communication is blocked and the cards are fully protected. When the cards are slid out 30 mm, their wireless signal is weak, but sufficient for communication over a short distance. This way your privacy remains secured in the best possible way.

All our wallets are RFID protected

SECRID

Warranty

i register.secrid.com

UNIQUE SERIAL NUMBER

Every Secrid product is given a unique serial number, engraved on the inside of the Cardprotector. This code represents the personal history of each wallet.

Once the new owner decides to register the wallet at register.secrid.com, the code is also connected to its user. Registering the product grants a proof of authenticity and a third year of warranty.
